Appendix E. Destination countries that do not use postal codes	98
Story of change	99

This document is not a final version and may be amended without any prior notice. The developer does not bear any liability for the use of the obsolete versions of the document.

1. Format of the request to API

To get access to API, use **user token** and **authorization bearer**. User token and authorization bearer can be obtained from the manager after signing an agreement. **User token** and **authorization bearer** must be obtained from the manager after signing the contract. The **authorization bearer** is passed in the request header in the **Authorization** parameter.

To transmit information in the body of the request, JSON format must be used.

A request consists of the lists of mandatory parameters

```
curl -X {query_type} header 'Content-Type: application/json' --header
      'Authorization: Bearer {bearer_Uuid}'
      'https://www.ukrposhta.ua/ecom/{app-name}/{request}'
```

- **{query_type}** – request type: GET, POST, PUT, DELETE
- Header: 'Authorization: Bearer {bearer_Uuid}' – Authorization bearer parameter for authorization
- **{app-name}** – ecom/0.0.1
- **{request}** is the endpoint of the API request, see the documentation below.

For the latest version of the API documentation, perform the following request:

GET request on <https://www.ukrposhta.ua/ecom/0.0.1/international-doc>

Example of the request:

```
curl -X GET --header 'Content-Type: application/json' --header
      'Authorization: Bearer 11111111-2222-3333-aaaa-bcdef1234567'
      'https://www.ukrposhta.ua/ecom/0.0.1/international-doc'
```

2. Address

Summary. The address is used for creating clients, postal items, etc. Personal ID is assigned to the created address.

Please, note! All fields of the address in the international item must be filled in Latin letters.

URI: /addresses

Methods: GET, POST

Table 2.1 JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
country	String	Country code in ISO 3166-1 alpha-2 format. By default, the sender indicates UA (Large Latin letters, 2 characters). Only US (US) can be specified for an Export+ shipment to the recipient.	Yes	Yes
postcode	String	Zip code If the country of destination is included in the list specified in Annex F, the postcode of the recipient is not required.	Yes	Yes
region	String	Region name (no more than 45 characters)	No	Yes
district	String	The name of the district (no more than 45 characters)	No	Yes
city	String	The name of the locality (no more than 45 characters). The value of foreignStreetHouseApartment must not match the city field value.	No	Yes
street	String	Street name (no more than 255 characters)	No	Yes
houseNumber	String	House number (no more than 15 characters)	No	Yes
apartmentNumber	String	Apartment number (no more than 15 characters)	No	Yes
description	String	Description or comments (no more than 255 characters).	No	Yes
foreignStreetHouseApartment	String	Street, house and apartment number. The parameter was created for the convenience of filling in the address in one line. The value of foreignStreetHouseApartment must not match the city field value.	No	Yes
countryside	Boolean	Countryside designation (true / false). Used for calculation of the tariff, is assigned automatically on the basis of the postcode (for items within the country).	No	No
detailedInfo	String	Parts of an address collected in a line separated by a comma.	No	No
id	Number (long)	Unique address identifier, assigned automatically when created.	No	No
created	String (LocalDateTime)	Date and time the address was created	No	No
lastModified	String (LocalDateTime)	Date and time of the last change of address	No	No

Creating an address

Note. If the address contains quotation marks, for the successful performance of the request, please use them as `\` `\`. For example, `"street": "Kyivska Hotel \"Kazka\""`.

POST Request URI:/addresses

```
{  
  "country": "PL",  
  "city": "Warsaw",  
  "postcode": "00-001",  
  "region": "Warsaw",  
  "foreignStreetHouseApartment": "Warsawska 56, app 45"  
}
```

Response Response code: 200

```
{  
  "id": 310691,  
  "postcode": "00-001",  
  "region": "Warsaw",  
  "district": null,  
  "city": "Warsaw",  
  "street": null,  
  "houseNumber": null,  
  "apartmentNumber": null,  
  "mailbox": "none",  
  "description": null,  
  "countryside": false,  
  "foreignStreetHouseApartment": "Warsawska 56, app 45",  
  "detailedInfo": "Польща, Warsaw, Warsawska 56, app 45",  
  "country": "PL",  
  "created": "2018-12-05T13:59:06",  
  "lastModified": "2018-12-05T13:59:06"  
}
```

For example, below are requests for:

▶ **getting** the created address

GET request on `{url}/addresses/{id}`

▶ **getting the** country of the created address in English

GET request on `{url}/addresses/{id}/countryNameInLatin`

Checking the availability of the delivery route between postcodes

GET Request URI:/availability-checking/from/{senderPostcode}/to/{recipientPostcode}

Response Response code: 200

```
{  
  "code": "SUCCESS",  
  "description": "Success. The route between the postcodes is available."  
}
```

3. Client

Summary. The client is used in the postal item as a sender and recipient. The counterparty can create any number of clients. For operations with clients, "the user token" is used: `/clients?token={token}`.

URI: `/clients`

Methods GET, POST, PUT, DELETE

Table 3.1. JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
latinName	String	Full name of an individual or company name in Latin letters. If the field is filled in, it cannot be deleted. It is only possible to update the data. ** If the country (except UA) is specified when creating the client's address, this field must be filled in.	Yes	Yes
addressId	Number (long)	Address ID, specifying the ID of the previously created address	Yes	Yes
phoneNumber	String	Phone number of the client (only numbers, from 3 to 25 characters). The phone number should not contain only the same numbers: it is forbidden to specify a number of format 111111.	Yes	Yes
edrpou*	String	EDRPOU of legal entity (only numbers 5-8 digits). The database allows to save only a valid EDRPOU. Before the creation is validated according to the algorithm. Website with validation algorithm.	*	Yes
TIN	String	Individual tax number for individuals and individuals entrepreneurs (only numbers for individuals 10, for individual entrepreneurs 12 digits). Only a valid TIN can be saved. Before the creation is validated according to the algorithm. Website with validation algorithm.	*	Yes
type	String (Enum)	Customer Type <ul style="list-style-type: none"> ◆ INDIVIDUAL ◆ COMPANY – legal entity ◆ PRIVATE_ENTREPRENEUR is an individual entrepreneur. The COMPANY type is set by default. The client type cannot be changed.	No	Yes
uniqueRegistrationNumber	String	Unique registration number	No	Yes
addresses	Array (List)	Addresses of the client. It has the following fields: <ul style="list-style-type: none"> ◆ uuid – unique identifier of the address of the created client; ◆ addressId – Address ID (see addressId field above). ◆ address – Address object in the created client. ◆ type – type of address (PHYSICAL – physical or LEGAL – legal); ◆ main – designation of the main address of the client. The customer can only have one primary address. If the client specified multiple addresses, the one with the main – true field will be used. See the section on creating an address.	No	Yes
phones	Array (List)	Client phone numbers. It has the following fields: <ul style="list-style-type: none"> ◆ uuid – unique identifier of the phone number of the created client; ◆ phoneId – ID of the client's phone number (used to get the phone number by the specified id); ◆ phoneNumber – Phone number. ◆ type – type of the client's phone number (WORK – working or PERSONAL – personal); ◆ main – designation of the main phone number of the client. A rider can only have one primary number. 	No	Yes

		If the client specified multiple phones, the one with the main field set to true will be used.		
bankAccount	String	Settlement account in international format – IBAN, 29 characters: <ul style="list-style-type: none"> • code of Ukraine (UA) • check digit (2 digits) • Bank MFO (6 digits) • Account number Separately, the MFO code of the bank is not transmitted in the request!	No	Yes
counterpartyUuid	String (uuid)	Identifier of the counterparty that created this client. This uuid is used for the client, the shipment, and is also indicated when forming documents for the shipment.	No	No
email	String	Client's Email. For Exports items, the sender's email address is required.	No	Yes
Emails	Array (List)	Client's Email Address. Has the following fields: It has the following fields: <ul style="list-style-type: none"> • uuid – unique email identifier of the created client; • email – email • main – designation of the main email address of the client. A customer can only have one primary email address. If the client has multiple email addresses, the address with the main field true will be used.	No	Yes
postId	String	Unique customer identifier provided by SC "Ukrposhta"	No	No
externalId	String	External customer identifier in the counterparty database	No	Yes
contactPersonName	String	Name of contact person	No	Yes
resident	Boolean	Resident of Ukraine. If the resident parameter is set to true, the client is a resident of Ukraine. When creating a client for the resident parameter, the default value is true.	No	Yes
UUID	String (uuid)	Unique identifier of the client	No	No
postPaymentType	String (Enum)	Cash on delivery type. Established by the branch operator after checking the information provided by the client. Takes the value: <ul style="list-style-type: none"> • Postpay_PAYMENT_CASH_ONLY • Postpay_PAYMENT_CASHLESS_ONLY • Postpay_PAYMENT_CASH_and_cashless If the client is set to CASH_ONLY, the transferPostpayToBankAccount parameter cannot be set to true. If CASHLESS_ONLY is set, the transferPostpayToBankAccount parameter cannot be false.	No	No
checkOnDeliveryAllowed	Boolean	Inspection upon delivery is allowed. If the field is set to true – when creating a shipment (all types), the client can set the review at delivery (see the " checkOnDelivery " field). The default value is: <ul style="list-style-type: none"> • for COMPANY - true • for PRIVATE_ENTREPRENEUR - true • for INDIVIDUAL – false 	No	No
GDPRRead	Boolean	Designations for acquaintance of the client with the general regulations of data protection. True - the client has read the provisions of the regulations. Default is false.	No	No
GDPAccept	Boolean	Designation for the client's consent to the provisions of the general data protection regulations. True - the client agreed with the provisions of the regulations. Default is false.	No	No
personalDataApproved	Boolean	Field indicating the confirmation of the details specified by the client. True - the client's details are specified correctly and have been confirmed by the operator. Default is false.	No	No

* If the client is a legal entity or a private entrepreneur, when creating a client, it is necessary to specify the individual tax number or USREOU. If none of these fields are filled in, an error will occur while creating the shipment.
 When creating a client with the "PRIVATE_ENTREPRENEUR" type, the tin is validated. In the case of creating a client with the "COMPANY" type, the USREOU validation is performed.

3.1. Verification of the phone number entered

Getting Invalid Phones

GET REQUEST

Uri:/phones/worldwide/prohibited?token={token}

Response

Response code: 200

[List of banned phones]

Verify correct phone entry

GET REQUEST

Uri:/phones/worldwide/prohibited/1234567?token={token}

Response

Response code: 200

```
{
  "phone": "1234567",
  "fromDate": "2018-12-05",
  "worldwide": true
}
```

For example, below are requests for:

- ▶ **getting** created clients with externalId

GET request on {url}/clients/external-id/{externalId}?token={token}

- ▶ **deleting** a customer's phone number

DELETE request on {url}/client-phones/{phoneNumberUuid}?token={token}

You can only delete a phone that has the main – false parameter

The response body is empty.

- ▶ **getting** all customer phone numbers

GET request on {url}/client-phones?token={token}&clientUuid={clientUuid}

- ▶ **deleting** customer address

DELETE request on {url}/client-addresses/{addressUuid}?token={token}

The address can be deleted only if it is not the main one (the main – false parameter).

The response body is empty.

- ▶ **getting** all customer addresses

GET request on `{url}/client-addresses?token={token}&clientUuid={clientUuid}`

- ▶ **delete** customer email

DELETE request on `{url}/client-emails/{emailUuid}?token={token}`

The email address can be deleted only if it is not the main one (the main parameter is set to false). The response body is empty.

- ▶ **receiving** all customer email addresses

GET request on `{url}/client-emails?token={token}&clientUuid={clientUuid}`

- ▶ receiving a customer by phone number

GET request on `{url}/clients/phone?token={token}&countryISO3166=UA&phoneNumber={phoneNumber}`

Response code: 200

4. International mail

Summary. Mail creation is the main business process of this API. Mail for any transactions accepts the counterparty's authentication token as a query parameter. Is user token: [/shipments used for shipment operations?token={token}](#). When creating a mail item, the recipient and sender are specified in the form of a nested JSON. When creating a shipment, the sender can specify additional information about the recipient, which is displayed on printed forms. In the current release, a postal item can only contain one parcel. Parameters of the shipment are filled based on the data of the parcel (weight, length, declared value, etc.). The delivery amount is calculated when creating a mail item and displayed in the response body as the ["deliveryPrice"](#) parameter.

To create an international shipment, the internationalData object must not be null. To print CN22, CN23 forms, the parcel must contain a collection of parcelItems (with a description of the contents of the postal item).

Uri: /shipments

Methods GET, POST, PUT

Table 4.1. JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
type	String	Type of shipment. For international mail, the type parameter can be set to: <ul style="list-style-type: none"> ◆ INTERNATIONAL – international shipment; ◆ INTERNATIONAL_consignment – consignment (see Consignment); 	Yes	Yes
package Type	String	Type of international shipment: <ul style="list-style-type: none"> ◆ LETTER – letter (cannot have declared value, declaredPrice); ◆ SMALL_BAG – small package (must have the recommended status tracked: true, can not have declared value, declaredPrice); ◆ PARCEL – a parcel (may have a declared value). ◆ EMS – international express delivery (only from automated offices); ◆ PRIME – Prime Shipment 	Yes	Yes
sender	JSON object	Sender's uuid. If the sender is a legal entity or an individual entrepreneur, the tin or edrpou field must be filled in. The sender must have a phone number.	Yes	Yes
recipient	JSON object	Recipient uuid	Yes	Yes
senderAddressId	Number (Long)	Sender's address ID. If the client does not have the same or a different address, its ID cannot be specified in this field. When creating an international shipment, it allows you to select an address in Latin.	Yes	Yes
recipientEmail	String	Recipient's e-mail address	Yes	Yes
deliveryType	String	Delivery Type There are 4 main types of delivery: <ul style="list-style-type: none"> ◆ W2D warehouse-door ◆ W2W warehouse-warehouse ◆ D2W door-warehouse ◆ D2D door-door 	Yes	Yes

weight	Number (Int)	Shipment weight (numbers only). Specifies the weight in grams. The maximum weight of the shipment is 30,000 grams. One of the main parameters when calculating the price. Shipment weight must be greater than zero.	Yes	Yes
length	Number (Int)	Departure length (numbers only). Specify the length in centimeters. One of the main parameters when calculating the price, the longest side is indicated. Shipment length must be greater than zero. Restrictions apply ¹ . If the shipment is of the PARCEL type (parcels weighing up to 10 kg with a declared value and parcels weighing more than 10 kg), the size of the largest side exceeds 70 cm inclusive (length/width/height), the cost calculation is carried out taking into account the coefficient for a large-sized shipment (calculationDescription. priceOversize rate) (at the moment - 1.25). For EMS shipment, the largest side should not exceed 150 cm.	Yes	Yes
parcels	Array (Set)	<p>Sending parameters Contains fields:</p> <ul style="list-style-type: none"> ◆ uuid – unique identifier of the package of departure parameters; ◆ --name name ◆ parcelNumber – seat number (for multi-seat shipments within the country); ◆ barcode – shipment BKI; ◆ weight – weight of the shipment in grams; ◆ length – Length in cm. ◆ width – Width in cm. ◆ height – height in cm; ◆ declaredPrice – declared value in UAH; cannot be more than the sum of "value" fields (to be filled in for all parcelitem). Declared value is indicated in UAH, and "value" can be indicated in 5 currencies (USD, EUR, UAH, GBP). ◆ parcelItems – an array with a description of the parameters of nested items (see the description below); For EMS, the number of parcelItems should not be more than 5; ◆ Description ◆ contentsType – Attachment type (DOCS or GOODS). <p>The width and height fields must be specified! The width and height can be equal to 0, but they must be passed in the request.</p> <p>For EMS, you must specify the contentsType field. It can mean: DOCS or GOODS (documents or goods). For other types, the field is not filled in. contentsType and InternationalData.CategoryType must be specified accordingly (if contentsType = DOCS, then InternationalData.CategoryType = DOCUMENTS, if GOODS – all other types except SALE_OF_GOODS).</p> <p>There are weight restrictions: documents – up to 1 kg, goods – up to 30 kg.</p>	Yes	Yes.

¹ Limit sizes for sheets, small packages. Any side should not exceed 60 cm, and the sum of all sizes – 90 cm. For rolls: the sum of the length and double diameter of the roll should not exceed 104 cm, and the maximum size is 90 cm. For parcels: any side — does not exceed 105 cm, and the sum of the length and the largest perimeter (length of the circle) in any direction (except for the length) does not exceed 200 cm. (Length + 2 * (height + width) ≤ 200 cm). For parcels (marked "bulky"): either side — does not exceed 200 cm, and the sum of the length and the largest perimeter (length of the circle) in any direction (except for the length) does not exceed 300 cm. (Length + 2 * (height + width) ≤ 300 cm). For EMS: any side does not exceed 150 cm, and the sum of the length and the largest perimeter (the length of the circle) in any direction (except the length) does not exceed 300 cm. (Length + 2 * (height + width) ≤ 300 cm).

parcelItems	Array (Set)	<p>Shipment items. When creating a position, you must specify the required fields:</p> <ul style="list-style-type: none"> • weight, • length • value – the value of the goods for customs (must be filled in). <p>and additional:</p> <ul style="list-style-type: none"> • Description • Quantity / number • countryOfOrigin – the name of the country of origin in ISO 3166-1 Alpha-2 format, • currencyCode – the name of the currency in which the estimated value of the dispatch item is indicated in ISO 4217 format. • latinName - the name of the attachment of the shipment in Latin letters. Must be filled in for international shipments. In the description of the attachment in English, it is forbidden to indicate the following words: BRYUKI, accessory, ACCESSORIES, gift, gift BOX, gifts, handmade gift, KOSTYUM, KURTKA, ODEZHDA, PODAROK, PRESENT, present, Shapka, SOLDATYKY, Souvenir, Souvenir SET, Souvenirs, SUVENIER, SUVENIR, Taina, XYDI, other, item, cadeau, or only numbers (for example 963258). The length should not exceed 32 characters. • name is the name of the item. For international shipments, if the name field in the request is empty, it is copied from the latinName field. Shipment position name is displayed in the format "latinName/name". For EMS shipments, the position name must be filled in, filled only in Cyrillic. • uuid – unique identifier of the shipment position; • hsCode – HS Code code. Must contain only digits (6 to 10 digits). If you specify the HS Code, be sure to specify the country of origin countryOfOrigin. Since 05.01.2023, the HS Code is mandatory. <p>For international shipments, only the latinName field is required. For EMS shipments, the name field is required.</p> <p>To update the data, you must specify the uuid of the desired parcelItem element.</p> <p>Item parameters are used as the main parameters in the shipment. The shipment can have no more than 4 positions. The weight and declared value of the items will be summed up, the weight of all items cannot exceed the total weight of the shipment. The completed information is displayed on customs declarations CN22 and CN23.</p>	Yes	Yes
internationalData	JSON Object	Object that contains the international shipment parameters.	Yes	Yes
UUID	String (uuid)	Unique identifier of the created shipment	No	No
recipientPhone	String	Additional phone number of the recipient. If the field is filled in, the number becomes the main one and is displayed in the documents	No	Yes
recipientAddressId	String	Recipient Address ID	No	Yes
returnAddressId	String	Return address: Specified additionally. If the returnAddressId parameter is omitted, the main address with the main field set to true will be used	No	Yes
shipmentGroupUuid	String	ID of the shipment group, if the shipment is a group	No	Yes
externalId	String	External Shipment ID in Counterparty Database	No	Yes

onFailReceiveType	String	Actions with the shipment if the recipient did not pick it up. If no field is specified, the default setting is return. <ul style="list-style-type: none"> RETURN – return to sender; RETURN_IMMEDIATELY – Return immediately to the sender. PROCESS_AS_REFUSAL - destroy the parcel. 	No	Yes
Barcode	String	Parcel barcode. Assigned only for recommended letters, recommended small packages, parcels (without declared value)	No	Yes
width	Number (Int)	Shipment width (numbers only). The width is indicated in centimeters.	No	Yes
height	Number (Int)	Shipment height (numbers only). The height is indicated in centimeters.	No	Yes
declaredPrice	Number (BigDecimal)	Declared shipping cost	No	Yes
deliveryPrice	Number (BigDecimal)	Calculated delivery price in UAH, formed on the basis of tariffs of JSC «Ukrposhta»	No	Yes
deliveryPriceUa	Number (BigDecimal)	A component of the tariff for shipment through the territory of Ukraine, which is subject to VAT. For international shipments with SMALL_BAG, PARCEL TYPE	No	No
deliveryPriceCurr	Number (BigDecimal)	Declared shipment price in currency.	No	No
rawDeliveryPrice	Number (BigDecimal)	Shipment price excluding discounts, VAT, etc.	No	No
postPay	Number (BigDecimal)	Amount of cash on delivery in UAH. Cannot be more than the declared value. Cash on delivery must be greater than 1 or null.	No	Yes
postPayUah	Number (BigDecimal)	Amount of cash on delivery in UAH.	No	No
currencyExchangeRate	Number (Float)	Exchange rate (to calculate the cost of international shipments in UAH at the time of creation of the shipment, according to the NBU)	No	No
currencyCode	String	Currency code for international shipments (default – USD)	No	Yes
postPayCurrencyCode	String	The currency code for international shipments is filled in automatically, depending on the country. The countries to which cash on delivery is allowed are listed below.	No	No
discounts	Array (List)	Customer Discount If the customer or counterparty has a discount, it is automatically assigned to the shipment. It can consist of several json objects. <ul style="list-style-type: none"> discount name fromDate – discount start date toDate – discount expiration date value – discount amount category – discount category type – type of discount, BASE – basic, MODIFIER – discount modifier. 	No	No
lastModified	String (LocalDateTime)	Date the last change was made to the shipment. The date and time are indicated in the format "2019-06-12T12:31:56"	No	No
description	String	Description or comments (no more than 255 characters).	No	Yes
statusTrackings	Array (List)	Tracking shipment	No	No
paidByRecipient	Boolean	Payment for the shipment upon receipt. True – payment by the recipient, false – payment by the sender. Defaults to false	No	Yes
bulky	Boolean	Mark bulky parcel. True – cumbersome, false – not cumbersome. Default – false	No	Yes
bees	Boolean	Mark of the bee. Default – false	No	Yes

Recommend	Boolean	Departure with notification of receipt. For shipments of the SMALL_BAG type, true is set by default when calculating the cost.	No	Yes
SMS	Boolean	SMS notification of the arrival of the parcel. If true, the message will be sent to the recipient. Default is false. (The service for which an additional fee is charged. Read more at ukrposhta.ua)	No	Yes
lifecycle	JSON object	Shipment status lifecycle. Contains fields: <ul style="list-style-type: none">status – Shipment status.statusDate: The time when the last status was assigned. After the shipment is created, the status changes to CREATED. After registering the shipment status – REGISTERED	No	No
postPayDeliveryPrice	String	Cash on delivery price	No	
postPayPaidByRecipient	Boolean	The party paying the cash on delivery fee. If true, the payee pays the amount. If false, the sender pays. Default postPayPaidByRecipient – true	No	Yes
calculationDescription	String	Description of the calculation, which specifies in detail on the basis of which components the cost of the postal item was formed: <ul style="list-style-type: none">price – the total cost of delivery of the shipment;destination country – Recipient's country.delivery type – Delivery type.weight tariff – The tariff for the weight of the shipment.bulky – surcharge for bulky shipment;notification – Message surcharge.with_vat – a description of the calculation of the cost of the shipment with VAT, taking into account the share for delivery on the territory of Ukraine.priceOversize rate – coefficient of calculation of a large international shipment;corier delivery – the cost of courier delivery of the consignment (byCourier: true). Calculated at a coefficient of 0.6.	No	No
priceChangedInPostOffice	Boolean	Field indicating whether the price of the shipment in the branch has changed (displayed only if the price in the branch has changed).	No	No

Table 4.2. InternationalDataobject parameters

Parameter	Type	Description	Required	Used in Forms
tracked	Boolean	Trackable shipment from BKI. Recommended status may include letters and small packages.	Yes	No
pickingByCourier	Boolean	Mark about the courier pickup of the international shipment	No	CN22, EMS, 103
UUID	String (uuid)	Unique identifier of the object.	No	No
transportType	String	Delivery Type May have the following meanings: <ul style="list-style-type: none"> ◊ GROUND – non-priority method of shipment; ◊ Avia is the priority shipping method. The default value is GROUND.	No	No
byCourier	Boolean	Service "Delivery by messengers in the country of destination of outgoing mailings, parcels (at the request of the sender) or delivery of a notification of receipt of items to the consignee." By default, the meaning is false. For EMS items, it should be false.	No	No
categoryType	String	Shipment Category: <ul style="list-style-type: none"> ◊ GIFT – Gift. ◊ COMMERCIAL_SAMPLE – commercial sample; ◊ Returning_GOODS – return of goods; ◊ DOCUMENTS – documents; ◊ SALE_OF_GOODS – sale of goods, cannot be specified for EMS; ◊ MIXED_CONTENT – Mixed content of the shipment (additionally, you must fill in the explanation field). 	Yes	CN23, CN22
cancelOrChange	Boolean	Service "For application for return to the sender of a postal item, postal order or change or correction of an address". Default is – false. For EMS items, it should be false.	No	No
licenceNumber	String	License number (if any).	No	CN23
certificateNumber	String	Certificate number (if any).	No	CN23
invoiceNumber	String	Account number (if any).	No	CN23
Explanation	String	Explanations. Required if shipment category is MIXED_CONTENT.	Yes	CN23
Comments	String	Notes	No	CN23
parcelQuantity	Number (int)	Number of parcels	No	CP71
certificateAndInvoiceQuantity	Number (int)	Number of certificates and invoices	No	CP71
declaredPriceSDR	Number (float)	Declared value in SDR (Special Drawing Right). Filled in automatically using the official NBU rate	No	CP71
avia	Boolean	Not applicable	No	No
taxes	Number (float)	Taxes	No	CN23
aviaReturn	Boolean	Return the shipment by air. If aviaReturn is true, return the shipment by air. If aviaReturn is false, return the shipment (combined SAL) by transport. Default is false. EMS must be false to send.	No	CN23
daysForReturn	Number (int)	Number of days to return. By default, it has a value of 30 days.	No	CN23
consignment	Boolean	Consignment. Default is false. EMS must be false to send.	No	CN23

directFlight	Boolean	<p>Delivery by direct flight. Used for shipments:</p> <ul style="list-style-type: none"> • SMALL_BAG type; • Country: USA • Type of AVIA delivery. <p>On the form CN22 is denoted by a capital letter "E" in the right corner. EMS must be false to send.</p>	No	CN22
additionalInfoForCustoms	String	<p>Additional information for customs. No more than 90 characters. It is possible to fill in for all types of international shipments except LETTER. The specified information is displayed on the appropriate forms, next to the recipient's data. For example, if you sold the product on a marketplace where the Recipient has automatically paid customs duties, enter the following information in this field: "Vat has been collected on Etsy. Etsy Ireland's Norwegian tax (VOEC) number is 2021137» If the field is filled in, it is not possible to specify a gift in the category type (gift) field.</p>	No	10X10, CN22 A5_215x 148, CN22 A6_148x 105, CN23 EMS, CN23 PARCEL
declaredByEK10	Boolean	<p>Default is false. Electronic customs declaration in EC-10 mode from a legal entity</p>	No	No

```

We calculate the cost of the shipment with the type Parcel, 1 kg, 50x90x50 cm.

```
"packageType": "PARCEL",  
"weight": 1000,  
"length": 50,  
"width": 90,  
"height": 50,  
"deliveryPriceCurr": 19.68,  
"deliveryPrice": 546.62,  
"deliveryPriceUa": 25,  
"currencyCode": "USD",  
"currencyExchangeRate": 27.7798,  
"calculationDescription": "Price=19.68USD(546.62UAH): destination country=DE;  
price=15.00USD; delivery type=Avia; weight tariff=3.60USD; notification=1.50USD;  
For personal account 3% (M.V.)=16.75; with_vat=541.62-25.0+(25.0+25.0*20.0%)",
```

Pre-payment Estimate

$$\text{Price} = ((15+3,60+1,50) * 27.7798 - 3\%) - 20 + 20 * 1,2 = (20,10 * 27.7798 - 3\%) - 25 + 25 * 1,2$$
$$= 541,62 - 25 + 30 = 546,62\text{grn.}$$

Settlement under the new tariff

Large Package Overpayment Ratio (PRICEOVERSIZE) = 1.2

$$\text{Price} = ((15+3.60+1.50) * 27.7798 * 1.2 - 3\%) - 20 + 20 * 1.2 = (20.10 * 27.7798 * 1.2 - 3\%) - 25$$
$$+ 25 * 1.2 = 649.95 - 25 + 30 = 654.95\text{UAH.}$$

----- created prime shipment-----

Please note that shipments with the PRIME type can only be sent to the countries from the following list.

Estonia	Singaporean	Malta
Lithuania	Swaziland	Netherlands
Morocco	Thailand	Norway
Omani	Tuvalu	Poland
United Arab Emirates	Vietnam	Portugal
Egypt	Latvia	Romania
France	Austria	Serbia (Rep.)
United Kingdom	Belgium	Saudi Arabia
Georgia	Switzerland	Sweden
Gibraltar	Cyprus	Slovenia
Jersey	Germany	Slovakia
China (People's Republic of) (CHN)	Denmark	Turkey
Hong Kong	Spain	Canada
Korea	Finland	Japan
Aruba	Greece	Brazil
Bhutan	Croatia	Indonesia
Chile	Hungary	Mauritian
Curaçao	Ireland	Mexico
Dominican Republic	Israel	New Zealand
India	Iceland	(including Ross Territory)
Myanmar	Italy	South Africa
Malaysia	Lebanon	USA
Solomon Islander	Luxemburg	Australia

```

For example, below are requests for:

👉 **receive** Created Shipments with Uuid
GET request on `{url}/shipments/{shipmentUuid}?token={token}`

👉 **deleting** a created mail item

DELETE request on
`{url}/shipments/{shipmentUuid}?token={token}`

A shipment can only be deleted if its status is CREATED.

The response body is empty.

👉 **checking the status of the change** in the price of the shipment in case of clarification of the parameters of the shipment in the BKI department.

GET request on
`{url}/shipments/barcode/{shipmentBarcode}/isPriceChangedInPostOffice?token={token}`

If the answer is "isPriceChangedInPostOffice: true"?, the price has been changed.

👉 **receiving** the status of shipment by uuid or BKI

GET request on

`{url}/shipments/{barcodeOrUuid}/lifecycle?token={token}`

👉 **obtaining** the status of cash on delivery (monitoring is possible only after registration in the department)

GET request on

`{url}/transfers/shipment-postpays/{barcodeShipPostpay}/with-recipient?token={token}`

👉 **receipt of** shipments, the price of which was changed in the department for the specified period.

GET request on

`{url}/shipments/sender/{senderUuid}/from/{fromDate}/to/{toDate}/isPriceChangedInPostOffice?token={token}&barcodes={true|false}`

If the barcodes = true parameter, the BKI will be specified in the response body, if false – uuid of shipments.

Response code: 200

5. Shipment group

Summary. The user can form a group of postal items and combine several postal items into one group to save time in the postal office. When scanning the Barcode identifier of any parcel, the operator sees information on all postal items in the group. If there are 5 or more postal items in group, Form 103a must be printed. If there are registered postal items in the group, "status" field: "REGISTERED", it will not possible to add the postal item to the group. For operations with mail groups, [user token: /shipment-groups is used?token={token}](#).

Uri: /shipment-groups

Methods GET, POST, PUT, DELETE

Table 5.1. JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
name	String	Group Name For shipments, EMS must not exceed 40 characters	Yes	Yes
package Type	String	Package type of shipment. When creating a group, you must specify the type of packaging of shipments that will be added to the group. For example, in a group in which packageType has the value "PARCEL", it is possible to add only parcels	Yes	Yes
UUID	String UUID	ID of the created group	No	No
type	String	Mail group type, for international mail type should be "INTERNATIONAL" by default "EXPRESS".	No	Yes
closed	Boolean	Closed group, if there is a shipment in the group with the status "REGISTERED", the group becomes closed. Cannot add shipment to closed group	No	No
created	String (LocalDate eTime)	Date and time the shipment group was created	No	No

Creating a shipment group

POST REQUEST

Uri: {url}/shipment-groups?token={token}

```
{
  "name": "Group 1",
  "type": "INTERNATIONAL",
  "packageType": "PARCEL"
}
```

Response

Response code: 200

```
{
  "uuid": "8277c68d-dce6-4a30-b03e-db8c57532195",
  "name": " Group 1",
  "type": "INTERNATIONAL",
  "packageType": "PARCEL",
  "created": "2020-04-14T00:39:17",
  "closed": false
}
```

Update Shipment Group

PUT REQUEST

Uri: {url}/shipment-groups/{shipmentGroupUuid}?token={token}

```
{
  "name": "Group 2",
  "type": "INTERNATIONAL"
}
```

Response

Response code: 200

```
{
  "uuid": "8277c68d-dce6-4a30-b03e-db8c57532195",
  "name": " Group 2",
  "type": "INTERNATIONAL",
  "packageType": "PARCEL",
  "created": "2020-04-14T00:39:17",
  "closed": false
}
```

Adding a Shipment to a Group

POST REQUEST

Uri:/shipment-groups/{shipmentGroupUuid}/shipments/{shipmentUuid}?token={token}

Response

Response code: 200

```
{
  "message": "Shipment bb8a0da3-4895-4834-bc4d-2100a91104c7 is assigned to group 7b1412ab-9726-40d0-af39-5102f4f83711"
}
```

Bulk Add Shipments to Group

PUT REQUEST

Uri:/shipment-groups/{shipmentGroupUuid}/shipments?token={counterpartyAdmin}

```
[
  "{shipmentUuid}",
  "{shipmentUuid2}"
]
```

Response

Response code: 200

```
[
  {
    "targetUuid": "2733ec47-6339-43a0-b320-ac520480a19e",
    "httpStatus": 200,
    "message": "Shipment was successfully updated"
  },
  {
    "targetUuid": "63c1a99b-2ba1-41dc-8738-3f73ebb3d634",
    "httpStatus": 200,
    "message": "Shipment was successfully updated"
  }
]
```

Bulk add shipments to a group

PUT REQUEST

Uri:/shipment-groups/{shipmentGroupUuid}/shipments?token={token}

```
[
  "{shipmentBarcode}",
  "{shipmentBarcode2}"
]
```

Response

Response code: 200

```
[ {
  "targetBarcode": "5003600000036",
  "httpStatus": 200,
  "message": "Shipment was successfully updated"
},{
  "targetBarcode": "50036000000117",
  "httpStatus": 200,
  "message": "Shipment was successfully updated"}]
```

Note! No more than 1000 items per request.

Note! If the shipment cannot be added to the group, the status 207 is returned (the shipment with an error is not added to the group). Other shipments are added to the group.

Creating a shipment in a group

POST REQUEST

Uri:/shipment-groups/{shipmentGroupUuid}/shipments?token={token}

```
{
  "sender":{
    "uuid":"{SenderUuid}"
  },
  "recipient":{
    "uuid":"{RecipientUuid}"
  },
  "deliveryType":"W2D",
  "paidByRecipient":true,
  "parcels":[
    {
      "weight":1200,
      "length":170
    }
  ]
}
```

Response

Response code: 200

[See Response of Created Shipments]

For example, below are requests for:

- 👉 **receipt** of the created shipment group
GET request on {url}/shipment-groups/{shipmentGroupUuid}?token={token}
- 👉 **deleting** a shipment from a created group
DELETE request on {url}/shipments/{shipmentUuid}/shipment-group?token={token}

In the response body, the user receives a shipment that is not assigned to any shipment group (shipmentGroupUuid: null).

Response code: 200, 207

6. Calculation of international shipments

6.1. Receiving the calculation of the international shipment

Summary. After the request, the calculation of the international shipment will be received: `uri:/international/delivery-price`.

Uri:/international

POST METHOD

Table 6.1 JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
deliveryPrice	Number (BigDecimal)	Shipment price in UAH and selected currency	Yes	No
weight	Number (integer)	Shipment weight in grams	Yes	Yes
packageType	String	Package type of shipment: <ul style="list-style-type: none"> ▶ LETTER ▶ SMALL_BAG ▶ PARCEL ▶ EMS (EMS Shipment) 	Yes	Yes
currencyExchangeRate	Number (Float)	Hryvnia exchange rate to the specified currency (USD)	Yes	Yes
currencyCode	String	Settlement currency code (at the moment in the tariffs for international shipments, the US dollar is used for the calculation)	Yes	Yes
recipientCountryIso3166	String	Name of the recipient country in ISO 3166-1 Alpha-2 format. (Large Latin letters, 2 characters)	Yes	Yes
length	Number (integer)	The largest side of the shipment ²	Yes	Yes
calculationDescription	String	Description of calculation	No	No
discounts	Array (List)	List of discounts. Fields: description – Description of the discount. If this field is not filled in, in the calculation description the discount name is generated as follows: discount + rate+% rate – The amount of the discount in percent. Cannot be negative.	No	Yes
declaredPrice	Number (BigDecimal)	Declared value of the shipment in UAH	No	Yes
deliveryPriceCurr	Number (BigDecimal)	Shipment price in USD	No	No
Recommend	Boolean	Recommended postal item	No	Yes

² Limit the size of sheets, small packages. Any side – does not exceed 60 cm, and the sum of all sizes – does not exceed 90 cm. For rolls: the sum of the length and double diameter of the rolls should not exceed 104 cm, and the largest dimension is 90 cm. If the shipment is bulky `bulky:true`, the largest side does not exceed 200 cm, and the sum of the length does not exceed 300 cm.

bulky	Boolean	Mark bulky parcel. True - Bulky parcel, false – Normal. The default value is false.	No	Yes
transport Type	String (Enum)	Type of delivery: • Avia – air delivery • GROUND – mixed ground delivery	Yes	Yes
byCourier	Boolean	Service "Delivery of outgoing mail, parcels (at the request of the sender) or delivery of notification of receipt of shipments to the addressee". Default is false.	No	Yes
cancelOr Change	Boolean	Service "For an application for return to the sender of a postal item, postal order or change or correction of the address". Default is false.	No	Yes
consignment	JSON object	Consignment – several postal items that are simultaneously submitted by one sender for shipment outside Ukraine. (used to calculate consignments)	No	No
pricePerUnit	Number (Float)	Price per shipment (for consignment)	No	No
pricePerKg	Number (Float)	Price per kg of shipment (for consignment)	No	No
forBulkyPercent	Number (Float)	Additional interest allowance for the "Caution" mark (for consignment)	No	No
width	Number (integer)	Shipment Width	No	Yes
height	Number (integer)	Departure Height	No	Yes

Note! For tariffs and prices of additional services, see the API documentation for international shipments.

6.2. Receiving tariffs for parcels for international shipments

Short description: an array of tariffs will be received after the request:
 uri:/dictionaries/tariffs/international/**parcel**

Uri:/dictionaries

GET METHOD

Table 6.2 JSON Body Parameters

Parameter	Type	Description
id	Number (long)	Fare ID
Weight	Number (float)	Shipment weight in grams
priceBase	Number (float)	Price per shipment unit in USD
priceGround	Number (float)	Price per kilogram of shipment by land/combined way in USD
priceAvia	Number (float)	Price per kilogram of air shipment in US dollars
priceBulky	Number (float)	The price for marking the shipment as bulky (% of the weight tariff)
declaredStatusSurcharge	Number (float)	Fee for the declared value of the shipment in US dollars
expeditionSurcharge	Number (float)	Fee for forwarding services for the original parcel with declared value
declaredPriceSurcharge	Number (float)	Commission from the amount of declared value, %
countryISO3166	Number (float)	Country code in ISO 3166-1 alpha-2 format.
fromDate	String (LocalDateTime)	Fare Start Date
isCommercial	Boolean	Commercial shipments. True – for parcels with declared value and weight more than 10 kg; false – other shipments

Receiving all tariffs for parcels

```

7. Receiving documents for printing

With the help of the requests listed below, you can get the following documents:

- form of the accompanying address form CP 71
- customs declaration form CN22, CN23
- dL Forms
- forms C6, TFP3, CN07, CP95+CN29bis

A separate service is used to print documents, so access to the service is carried out by a separate uri:

`{formUrl}` = <https://www.ukrposhta.ua/forms/ecom/0.0.1/>

It is also possible to use an ecom [URI](#) to print documents.

Note! We recommend switching to the new uri because the previous one will be disabled later.

The printed form of the form of the accompanying address CP71 in PDF format can be obtained at:

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/cp71?token={token}
```

The printed form of the customs declaration form CN22 in PDF format can be obtained at:

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/cn22?token={token}
```

The printed form of the customs declaration form CN23 in PDF format can be obtained at:

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/cn23?token={token}
```

CN22 and CN23 can be printed for a shipment that contains no more than 4 attachments (parcel).

Form 103a for a group of postal items is available at:

```
{formUrl}/shipment-groups/{shipment_group_uuid}/form103a?token={token}
```

The DL form on the envelope with the addresses of the sender / recipient is available at:

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/dl?token={token}
```

To print a DL form on A4/A5 or 10x10, you must specify the `&SIZE_A4/SIZE_A5` or `SIZE_10X10` parameter.

The form for an envelope in C6 format with the addresses of the sender / recipient is available at:

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/c6?token={token}
```

To print form C6 on A4/A5, you must specify the parameter &SIZE_A4/SIZE_A5

TFP3 cash on delivery form

```
{formUrl}/international/shipments/{shipment_uuid or barcode}/tfp3?token={token}
```

Generate all necessary forms for shipment

PDF form for letter: DL;

PDF form for small package: CN22;

PDF form for parcel: CN23, CP71, C6,

+ forms CN07, CP95 + CN29bis and TFP3 if there is a notice of delivery or cash on delivery

```
{formUrl}/international/shipments/{ShipmentUuid or barcode}/forms?token={token}
```

The form for the CP95 + CN29bis cash on delivery form is printed at the link:

```
{formUrl}/international/shipments/{ShipmentUuid or  
barcode}/cp95_cn29?token={token}
```

Form for the form of the service "Notice of Delivery" CN07. Available at:

```
{formUrl}/international/shipments/{ShipmentUuid or barcode}/cn07?token={token}
```

The updated customs declaration form + address label with the possibility of choosing the size A5, A6 or 10x10 cm (SIZE_A5, SIZE_A6 and SIZE_10X10, respectively) are printed by the link (only for small packages):

```
{formUrl}/international/shipments/{shipment_uuid or  
barcode}/cn22?token={token}&size=SIZE_A5
```

Obtaining all necessary documents for small packages (size A5 or A6):

```
{ formUrl }/international/shipments/{ShipmentUuid or  
barcode}/forms?token={token}&size=SIZE_A5
```

Obtaining the necessary documents for all shipments in the group

```
{ formUrl }/shipment-groups/{uuid}/forms?token={token}&size={size}
```

The SIZE parameter can be set to:

- ▶ SMALL_BAG — SIZE_A5 (default), SIZE_A6, SIZE_10X10
- ▶ LETTER - SIZE_A5 (default), SIZE_A6, SIZE_A4, SIZE_10X10
- ▶ PARCEL - SIZE_A4 (default)

Receiving documents for shipments with declared value

```
{ formUrl }/shipment-groups/{uuid}/cn07?token={token}
```

Receiving documents for shipments with cash on delivery (tfp3)

```
{ formUrl }/shipment-groups/{uuid}/tfp3?token={token}
```

Receiving documents for shipments with cash on delivery (cp95 and cn29)

```
{ formUrl }/shipment-groups/{uuid}/cp95_cn29?token={token}
```

Receiving the cn22 form for all shipments from the group

```
{ formUrl }/shipment-groups/{uuid}/cn22?token={token}&size={size}
```

Getting the dl form for all shipments from the group

```
{ formUrl }/shipment-groups/{uuid}/dl?token={token}&size={size}
```

Receiving form c6 for all shipments from the group

```
{ formUrl }/shipment-groups/{uuid}/c6?token={token}&size={size}
```

Receiving the cn23 form for all shipments from the group

```
{ formUrl }/shipment-groups/{uuid}/cn23?token={token}&size={size}
```

Receiving the cp71 form for all shipments from the group

```
{formUrl}/shipment-groups/{uuid}/cp71?token={token}&size={size}
```

Getting the tfp3 form for all shipments from the group

```
{formUrl}/shipment-groups/{uuid}/tfp3?token={token}&size={size}
```

Getting a shortcut for all shipments from a group

```
{formUrl}/shipment-groups/{uuid}/sticker?token={token}&size={size}
```

Getting a label for items with the PARCEL TYPE

```
{formUrl}/international/shipments/{shipment_uuid_barcode}/sticker?token={token}&size={size}
```

EmS

Receipt of CN23 EMS form:

```
{formUrl}/international/shipments/{shipment_uuid_barcode}/ems?token={token}
```

Receiving the CN23 EMS form for a group of shipments:

```
{formUrl}/shipment-groups/{shipment_uuid_barcode}/ems?token={token}
```

Form 103

Form 103a for a group of postal items:

```
{formUrl}/shipment-groups/{shipment_group_uuid}/form103a?token={token}
```

NOTE! On the form 103, the amount of VAT is indicated for delivery only on the territory of Ukraine.

Response code: 200

8. Requesting collection by a courier

Summary. For international shipments with the type **EMS**, **SMALL_BAG** and **PARCEL**, the client can form an application for a courier fence. To form an application, the sender's index specified at the time of creating the address must be included in the service area of the courier delivery station (DCD). The delivery type of the shipment must have the values D2W, D2D (door – compartment, or door - door) for ordering a courier fence of the type SINGLE, or W2D, W2W (compartment – door, compartment – compartment) for ordering a courier fence of the type MASS – mass fence (from 10 shipments).

1. Create an application using API.
2. The dispatcher of the courier service will contact you at the specified phone number to clarify and confirm the application.
3. Once confirmed, the claim status will be changed to TO_PERFORM.
4. Pass the shipment along with the accompanying documentation to the courier arriving at the agreed time.

NOTE! If the PKI of one of the shipments was previously indicated in the application for a courier fence, this PKI can be indicated in another application again.

Table 8.1 JSON Body Parameters

Parameter	Type	Description	Required	Passed in the request
clientId	String (uuid)	Uuid of the customer (sender) ordering the courier fence	Yes	Yes
type	String (Enum)	Type of courier fence. May have a value: <ul style="list-style-type: none"> Single MASS – mass fence. 	Yes	Yes
addressId	Number (Int)	ID of the sender's address the courier should arrive at	Yes	Yes
phoneId	Number (Int)	Rider Phone ID	Yes	Yes
dropDate	String (LocalDate)	Courier Arrival Date	Yes	Yes
INTERVAL	String (Enum)	Time interval when the courier should arrive. May have a value: <ul style="list-style-type: none"> INTERVAL_09_12 – from 9 to 12; INTERVAL_12_15 – from 12 to 15; INTERVAL_15_18 – from 15 to 18. 	Yes	Yes
shipmentB arcodes	Array (List)	Shipment BKI list	Так - Yes*	Yes
email	String	E-mail	No	Yes
lastStatus	String (Enum)	The current status of the courier request. May have a value: <ul style="list-style-type: none"> Ordered – ordered (received application), TO_PERFORM - for execution (after clarifying the details of the application, it was decided to transfer the application to the department), Transferred_TO_COURIER – the request was sent to the courier, DONE – completed (the courier returned to the DKD and notified about the execution of the application), POSTPONED – postponed (application postponed for another time), DENIED (after clarifying the details of the application, it cannot be fulfilled), 	No	No

		▶ NOT_DELIVERED – not delivered, absence of the recipient during the courier's visit or refusal to send during the courier's visit.		
lastStatusDate	String (LocalDate Time)	Date and time of the last update of the application status	No	No
orderNumber	Number (Int)	Created order number	No	No
UUID	String (uuid)	Uuid created order courier fence	No	No
courierLastName	String	Last name of the courier. Information about the courier and the vehicle performing the request can be obtained after changing the status of the request to transferred_TO_COURIER.	No	No
courierFirstName	String	Courier Name	No	No
courierMiddleName	String	Middle name of the courier	No	No
courierPhoneNumber	String	Courier contact phone number	No	No
carNumber	String	Courier Vehicle Number	No	No
carType	String	Courier Vehicle Type	No	No

*You must specify at least one of the fields with the list of BKI.

Creating a courier collection request

]
```

9. Restrictions on shipments by country

Summary. For each country, there is a list of allowed additional services and dispatch parameters, to obtain this list, you must create a request.

Checking the possibility of shipment by country and type of package

GET REQUEST

Uri /shipments/check-availability?country={country_code}&product={package_type}

Response

Response code: 200

```
{
  "country": "AU",
  "packageType": "SMALL_BAG",
  "available": "true"
}
```

Receiving Shipment Types Available for Shipment to a Specified Country

GET REQUEST

Uri /shipments/check-availability?country={country_code}

Response

Response code: 200

```
[
  {
    "packageType": "LETTER",
    "transportType": "AVIA"
  },
  {
    "packageType": "SMALL_BAG",
    "transportType": "AVIA"
  },
  {
    "packageType": "PRIME",
    "transportType": "AVIA"
  },
  {
    "packageType": "PARCEL",
    "transportType": "AVIA"
  },
  {
    "packageType": "PARCEL",
    "transportType": "GROUND"
  },
  {
    "packageType": "EMS",
    "transportType": "AVIA"
  }
]
```

Getting Shipment Restriction by Country Code

GET REQUEST

Uri /constraints-per-countries/by-parameters?token={token}&countryISO3166=US

Response

Response code: 200

```

    "shipmentTracked": false
  }
]
```

Table 9.1 JSON Body Parameters

Parameter	Description	Presence of a parameter in the API
iso3166	Country code in ISO 3166-1 alpha-2 format. By default, the sender has UA installed. (Large Latin letters, 2 characters).	yes
declaredPriceSDRMaxGround	The maximum declared value of sending to the SDR (special drawing rights) for sending correspondence in ³ a combined way.	yes
declaredPriceSDRMaxAvia	The maximum declared value of sending to the SDR (special drawing rights) for sending correspondence by air.	yes
customsDeclarationCountGround	Number of customs declarations for sending correspondence in a combined way.	no
customsDeclarationCountAvia	Number of customs declarations for sending correspondence by air.	no
aviaWithCourierParcelAllowed	Additional service "delivery of feasible" parcels by air transport.	yes
maxWeightGroundParcel	The maximum weight for sending parcels in a combined way (no more than 30 kg).	yes
maxWeightAviaParcel	The maximum weight for sending parcels by air (no more than 30 kg).	yes
declaredPriceSDRMaxGroundParcel	The maximum declared value of sending to the SDR (special drawing rights) for sending parcels in a combined way.	yes
declaredPriceSDRMaxAviaParcel	The maximum declared value of the shipment to the SDR (Special Drawing Rights) for sending parcels by air.	yes
customsDeclarationCountGroundParcel	The number of customs declarations for sending parcels in a combined way.	no
customsDeclarationAviaParcel	Number of customs declarations for sending parcels by air.	no
aviaWithCourierAllowed	Additional service "delivery to the feasible" for sending correspondence by air.	yes
bulkyGroundParcelAllowed	The "bulky" mark for sending parcels in a combined way.	yes
postpayAviaParcelAllowed	Cash on delivery service for parcels shipped by air.	yes
personalHangingGroundAllowed	Additional service "delivery in person" for sending correspondence in a combined way.	yes
groundWithCourierAllowed	Additional service "delivery as possible" for sending correspondence in a combined way.	yes
declaredPriceAviaParcelAllowed	Sending parcels with declared value by air.	yes
bulkyAviaParcelAllowed	The "bulky" mark for sending parcels in a combined way.	yes
postpayGroundParcelAllowed	Cash on delivery service for parcels shipped in a combined way.	yes
personalHangingAviaAllowed	Additional service "delivery in person" for sending correspondence by air.	yes

³ Correspondence is letters, small packages and other shipments, except for parcels.

declaredPriceAviaAllowed	Sending correspondence with declared value by air.	yes
declaredPriceGroundAllowed	Sending correspondence with declared value in a combined way.	yes
groundWithCourierParcelAllowed	Additional service "delivery" for sending parcels in a combined way.	yes
declaredPriceGroundParcelAllowed	Sending parcels with declared value in a combined way.	yes
declaredPricePostpayGroundAllowed	Sending cash on delivery of correspondence with declared value in a combined way ⁴ .	yes
declaredPricePostpayAviaAllowed	Sending cash on delivery of correspondence with declared value by air ⁵ .	yes
currencyGroundAllowed	Transfer of currency in a combined way.	no
currencyAviaAllowed	Transfer of currency by air.	no
restanteAviaParcelAllowed	Sending the parcel "to the requirement" by air.	no
restanteGroundParcelAllowed	Sending the parcel "to the requirement" in a combined way.	no

^{4.5} In the API, there is no way to choose how to send the cash on delivery.

Appendix A. Response Codes

Response Code	Explanation
200	Success
400	Invalid Request
401	Not Authorized
500	Internal Server Error

Appendix B. Swagger specification for Ukrpost API

To get the Swagger specification in JSON format, you need to send an HTTP GET request to: <https://www.ukrposhta.ua/ecom/0.0.1/api-docs>.

It is possible to get acquainted with the automatically generated documentation and test the work of requests in the test environment on the developer portal <https://dev.ukrposhta.ua/documentation>.

Appendix B. Tariffs for international shipments

Please, note! Current tariffs are posted on the website of Ukrposhta www.ukrposhta.ua/ua/taryfy.

Distribution of foreign states and territories into 3 tariff zones for the "small package"			
Zone	Region	Country	
1	Countries of the former CIS:	Azerbaijan	Moldova
		Armenia	Tajikistan
		Georgia	Turkmenistan
		Kazakhstan	Uzbekistan
		Kyrgyzstan	
	Eastern Europe	Latvia	Czech Republic
		Bulgaria	Poland
		Lithuania	Romania
		Slovakia	Hungary
	Southern Europe	Albania	Canary Islands (Spain)
		Andorra	Macedonia
		Bosnia And Herzegovina	Malta
		Vatican	Portugal
		Gibraltar	San Marino
		Greece	Serbia
		Italy	Slovenia
		Spain	Croatia
		Cyprus	Montenegro
		Western Europe	Austria
	Belgium		Luxemburg
	Germany		Monaco
	Switzerland		Netherlands
	France		
	Northern Europe	Denmark (with Greenland)	Norway
		United Kingdom	Faroe Islands
		Estonia	Finland
		Ireland	Sweden
		Iceland	
	Middle Eastern / North African	Algeria	Lebanon
		Afghanistan	Libyan
		Bahrain	Morocco
		Egypt	United Arab Emirates
		Yemeni	Omani
		Western Sahara	Palestinian (Autonomous Palestinian Territories)

		Jordan	Saudi Arabia	
		Israel	Syrian Arab Republic	
		Iraq	Sudanese	
		Iran	Tunisian	
		Qatar	Turkey	
		Kuwait		
2	East Asia	Mongolia	Republic of Korea	
		Hong Kong	North Korea	
		China	Japan	
		Taiwan		
	North America	United States (with Alaska and Hawaii)	Canada	
3	South and Southeast Asia	Bangladesh	Malaysia	
		Brunei Darussalam	Maldivian	
		Bhutan	Nepalese	
		Vietnam	Pakistani	
		Diego Garcia	Singaporean	
		India	Thailand	
		Indonesia	Philippines	
		Cambodia	Sri Lanka	
		Lao People's Democratic Republic	Myanmar (Burma)	
		South America	United States Virgin Islands	Costa Rica
			Anguilla	Cuban
			Antigua & Barbuda	Curaçao
			Argentina	Martinique
			Aruba	Mexico
			Bahamian	Montserrat
			Barbados	Nicaraguan
			Belizean	Turks & Caicos Islands
			Bermuda	Panama
			Bolivia	Paraguayan
			Brazil	Peru
			British Virgin Islands	Puerto Rico
			Venezuela	El Salvador
			Guyana	Saint Martin
		Guadeloupe	Saint Pierre And Miquelon	
		Guatemala	Saint Vincent and the Grenadines	
		French Guiana	Kittitian/Nevisian	
		Honduras	St. Lucia	
			Surinamese	
		Central and South America (continued)	Grenada	Trinidad & Tobago
			Dominican (Dominica)	Uruguay

		Dominican (Dominican Republic)	Falkland Islands (Malvinas)
		Ecuador	French Antilles
Oceania and other parts of Africa		Cayman Islands (UK)	Chile

		Malawi	Fiji (islands)
		Small	French Polynesia
		Mariana Islands	Central African Republic
		Marshall Islands	Chad

Package without declared value

Package without declared value

The tariff consists of a fee for the parcel (piece) + per mass (depending on the method of delivery: air or combined) + VAT

Maximum weight – 30 kg.

The weight of parcels is rounded according to the following rule:

- for a parcel without declared value – in kilograms and hundreds of grams (rounding up any number of grams to hundreds);

Additional:

Packages with marks: Bulky – additionally cost 50% to the tariffs for mass

Declared Value Package

The tariff for a parcel with declared value consists of the following components:

- payment for a simple parcel (piece)
- + for the mass of a simple parcel (depending on the method of delivery: air or combined)
- 2.50 USD Expedition fee for original parcel with declared value (for each parcel)
- + 0.5% for the declared value of the postal item from the amount of the declared value in UAH, but not less than \$1 USA

*Total amount = (Sum of components of tariffs without VAT – % discount under the contract) – Fixed tariff in Ukraine + Fixed tariff in Ukraine * 20% VAT*

Maximum weight – 30 kg.

The weight of parcels is rounded according to the following rule: for a parcel with a declared value – in kilograms and tens of grams (rounding any number of grams to ten upwards).

Calculation of the cost, including VAT, for delivery only on the territory of Ukraine

For shipments with the SMALL_BAG type, PARCEL, the cost of delivery is calculated taking into account VAT, which is charged only for shipment within the territory of Ukraine.

The total tariff is composed by the following formula:

Total amount = (Sum of components of tariffs without VAT – % discount under the contract) – Fixed tariff in Ukraine + Fixed tariff in Ukraine * 20% VAT (see the example of calculation below).

Example of calculating the cost of delivery:

Small package to the USA weighing 2 kg (air):

```
"calculationDescription": "Price=21.55USD(574.57UAH): destination country=US; delivery type=Avia; price=19.48USD; recommended=2.50USD; Discount 3% (m.v.)=17.58; with_vat=568.57-30.0+(30.0+30.0*20.0%)"
```

```
Shipping cost = 21.55USD(574.57UAH):  
destination country=US;  
tariff=19.48USD;  
delivery type=Avia;  
recommended shipment: 2.50USD;  
discount 3% (M.V.) = 17.58;  
description of cost calculation with VAT, with_vat=568.57-30.0+(30.0+30.0*20.0%)
```

Tariff rounding

When determining the amount of payment for services, the final fee, calculated on the basis of current tariffs, is rounded.

Rounding is carried out in the following order: up to 0.5 kopecks is discarded; 0.5 and above is rounded to 1 kopeck.

The final fee for the service provided and the amount of accrued value added tax are subject to collection from the client. In the case of receiving groups of postal items, the fee for sending them is determined by calculating the fee for sending each postal item separately, with the subsequent compilation of the results obtained.

Story of change

New in version of 25.09.2017:

1. In Shipment International data, the "addressForReturnId" parameter is deleted – the return delivery of the shipment, instead of it, "returnAddressId" is used.
2. Added parameter "deliveryDate" – estimated date of delivery of the shipment.
3. Created restrictions on length, limit sizes for letters, parcels, small package, international shipment with declared value: Any party – not exceeding 60 cm, and the sum of all measurements – not exceeding 90 cm. For rolls: the sum of the length and double diameter of the rolls should not exceed 104 cm, and the largest dimension is 90 cm.
4. In Shipment International data, the parameter "onlyPrintedIssues" is added – only printed editions for parcels on the DL address label, C6 is printed as the Imprimes mark.
5. Changed tariffs for the calculation of parcels weighing more than 10 kg.
6. In Shipment added the ability to delete shipment items (parcel item)
7. Shipment deleted toreturntosender option
8. Added the ability to print all required PDF forms for the created shipment.
{url}/international/shipments/{ShipmentUuid}/forms?token={token}

New in version 26.10.2017:

1. Shipment, international data if w2D=true, withDeliveryNotification must be true
2. Shipment Group, deleted counterpartyUuid parameter
3. Added PDF form for CP95 +CN 29bis cash on delivery form. Available at:
{url}/international/shipments/{ShipmentUuid}/cp95_cn29?token={token}
- Added PDF form for CN07 "Notice of Delivery" service form. Available at:
{url}/international/shipments/{ShipmentUuid}/cn07?token={token}
4. Shipment, the changed limit dimensions if the shipment bulky:true, the largest side does not exceed 200 cm, and the sum of the length does not exceed 300 cm.
5. Client, added parameter nameEn, firstNameEn, lastNameEn

New in version 17.11.2017:

1. Added endpoint to bulk add shipments to mail group.
{url}/shipment-groups/{shipmentGroupUuid}/shipments?token={{counterpartyAdmin}}
2. PDF form 103 for group shipments has been deleted, instead of it, form 103a is used, the endpoint for receiving form 103 forms form 103a

New in version of 28.11.2017:

1. Added new form cn 22 for small packages and international shipments with declared value with the ability to choose the size of A5 and A6
{url}/international/shipments/{shipmentUuid}/cn22?token={token}&size=SIZE_A5.
{url}/international/shipments/{shipmentUuid}/cn22?token={token}&size=SIZE_A6
2. Added the ability to receive all shapes with the ability to choose the size of A5 and A6, only for small packages and international shipments with declared value
{url}/international/shipments/{shipmentUuid}/forms?token={token}&size=SIZE_A5

New in version 18.12.2017:

1. Shipment option "recommended" has been removed, instead InternationalData added parameter "tracked" (mail from BKI)
2. Added new restrictions on international shipments for more details see [here](#)
3. Shipment in categoryType added type SALE_OF_GOODS – sale of goods

New in version of 03.01.2018:

1. Changed tariffs for international shipments
2. If there are registered shipments in the group, "status": "REGISTERED", it is not possible to add shipments to the group.
3. In Shipment, the status parameter has been transferred to the body of the lifecycle parameter, now: "lifecycle": {"status": "CREATED", "statusDate": "2018-01-02T 11:18:33"}.
4. DiscountPerClient replaced with discount

New in version 18.01.2018:

1. The "type" parameter, the client type, has been added to the Client. After the next update, the "individual" parameter will be deleted.
2. Parameter check added to Client: "tin" (tin)
3. In Shipment, "categoryType": "Other" was replaced with "MIXED_CONTENT".

New in version from 01.02.2018:

1. Added endpoint for country restrictions.
2. Changed tariffs for MVP with declared value
3. Added endpoint for receiving CN22 form for small packages in 100*100 format

New in version from 01.02.2018:

1. The "foreignStreetHouseApartment" field has been added to the address to fill in the address in one line after indicating the country and city.

New in version from 01.03.2018:

1. Added the ability to print CN22 forms for parcels.

New in version of 29.03.2018:

1. Address, added endpoint for getting the name of the country of the created address in English {url}/addresses/{addressId}/countryNameInLatin
2. Consignment, consignment module added country Azerbaijan
3. "recipientAddressId" must be one of the recipient's addresses
4. Updated Form 103
5. Discounts, added fields "applicableToCountries" – discount is intended for the country, "applicableToPackageTypes" – discount is intended for the type of packaging.

New in version of 29.03.2018:

1. Shipment Group has added the ability to bulk add shipments to the group using BKI.
2. In Shipment Discount, the "applicableToAllDeliveryTypes" field is added if the discount applies to all shipping types.
3. In Shipment, the "nonCashPayment" field has been deleted.
4. In Shipment Added validation for "parcelItems" in international shipments, for parcels with the type PARCEL, banner, SMALL_BAG, DECLARED_value
Also fields: description, quantity, value, weight, currencyCode - are required.

New in version of 21.04.2018:

1. In Shipment, the ability to create shipments in a group of shipments has been removed by specifying the uuid of the group of shipments.
2. In Shipment, the discount object was replaced with an array of discounts consisting of discount objects
3. Added request to create shipment in **POST** group {url}/shipment-groups/{shipmentGroupUuid}/shipments?token={token}

New in version of 21.06.2018:

1. In Shipment, the avia field is replaced with the transportType field, in which one of two values can be specified: GROUND or AVIA.
2. For shipments with the INTERNATIONAL_consignment type, the consignment mark is added on the forms DL, C6, CN22(A6, A5, 10x10), CN23, CP71.

New in version of 05.07.2018:

1. The packageType field has been added to the shipment group, only shipments with the same packageType can be added to the shipment group, for example, only parcels can be added to one shipment group. When creating groups, you must specify the type of package that will be added to the group.
2. A new endpoint has been added to retrieve the latest version of the {url}/international-doc documentation.

New in version of 04.09.2018:

1. Added an endpoint for receiving shipments, the price of which was changed in the department for the specified period.
2. Added the priceChangedInPostOffice field to the shipment
3. Added an example of creating an international letter type shipment.

New in version 26.09.2018:

1. Changed the format of displaying an array of Discount objects.

New in version 18.10.2018:

1. Added a restriction for the client.name field:
 - name should not be more than 60 characters;
 - special characters cannot be entered in the field;
 - added a filter of abbreviations MFO, USREOU, USREOU, tin, Inn, R/R, R/R;
 - you cannot enter more than 6 digits in a row in the field.
2. Parameter &showDeclaredPrice for Form 103a changed to &hideDeclaredPrice=1/0
3. Added an additional size parameter for printing DL and C6 forms.

New in version of 07.12.2018:

1. For Client, the firstNameEn, lastNameEn, nameEn fields have been deleted.
2. Added the latinName field for the Client.
3. Added the senderAddressId field for Shipment.
4. For the Client, the individual field was deleted and the personalDataApproved field was added.
5. Added tin validation when creating a client with the "PRIVATE_ENTREPRENEUR" type.
6. Added validation of the USREOU when creating a client with the "COMPANY" type.
7. Phone number verification has been added for Sender.
8. Added sections of documentation for working with the calculation service.
10. When creating an address, the created and lastModified fields are added – the date of creation and change of the address, respectively.
11. The format of displaying the address in Shipment has changed.
12. Added endpoints to verify the correctness of entering a phone number.

New in version of 17.04.2019:

1. The bank name was added to the TFP3 form and the TFP3 (better quality) template was updated.
2. Added the ability to receive printed forms for shipments by BKI.
3. The template of the CH22 A6 form has been changed – the length of the sendTo and sendFrom blocks has been increased.

4. The name of the country Swaziland (English. Swaziland was changed to the Kingdom of Eswatini. Kingdom of Sewatini.

New in version of 26.06.2019:

1. The location of the recipient's address has been changed on CN22 A5 forms.
2. The directFlight field has been added to the shipment (internationalData). The CN22 form adds a capital "E" designation for this shipment type.
3. For the daysForReturn (internationalData) field, the default value is 30 days.
4. Updated Section 8, changed the URI for printing accompanying documents.

New in version of 07.08.2019:

1. Added requests to receive accompanying documentation for a group of shipments.
2. For the form CN23 and CP71, the font in the street line is enlarged.
3. For the Client, a description of the current account in IBAN format has been added.
4. Added the isBankAccountIban field for the Client.

New in version of 15.10.2019:

1. Added [section](#) with information on export+ shipments.
2. Added request to print [accompanying documentation](#) for Export+ shipment.
3. [Annex D](#) provides an example of the supporting documentation for the Export+ shipment.
4. A new INTERNATIONAL_EXPORT_PLUS value has been added to [type](#).
5. Added [latinName](#) and name fields to parcelItems.
6. Added the spaceDimensionsSum field to [shipment](#).
7. Added exportPlus to [shipment](#).
8. Added the MIXED_CONTENT value to the categoryType field.
9. [A table with updated consignment rates has been added to Appendix E.](#)

New in version of 20.12.2019:

1. [Annex B](#) amends tariffs for small packages and parcels weighing more than 10 kg.
2. The name of the country "Macedonia" is corrected to "Republic of North Macedonia".
3. Removed description of fragile, forFragile, priceFragile, fragileAviaParcelAllowed, fragileGroundParcelAllowed fields.
4. If a prepayment is specified for a shipment with a DECLARED VALUE (DECLARED_VALUE), it cannot be created in Russia.
5. Added an example of getting the city and state by index to the Departure Export+ section.

New in version dated 24.01.2020:

1. The description of the bankAccount field was changed, the bankCode and isBankAccountIban field were deleted. The current account of the client is indicated only in IBAN format.

New in version 12.02.2020:

1. Information on the tariffs for courier air delivery of consignment shipments to Moldova has been added to the Consignment section.

New in version of 08.04.2020:

1. Declared value cannot be greater than the sum of the parcelitem.value fields.
2. The created field has been added to the shipment group.

New in version 22.04.2020:

1. The size of 10x10 is prohibited for printing the DL form. For CN23, the Redirect to address below field has been removed.

New in version 30.06.2020:

1. Tariffs for the calculation of international shipments of the type of small package, parcel and MPV with declared value have been changed, the calculation of the share with VAT for delivery only on the territory of Ukraine has been changed (Appendix B).
2. The deliveryPriceUa and with_vat fields are given for the shipment (a description of the calculation of the share with VAT for delivery only on the territory of Ukraine).

3. Changed examples of creating a parcel and a small package, preliminary calculation of the cost of the shipment.

New in version 10.07.2020:

1. For an international letter, the possibility of printing a DL form with a size of 10x10 has been added – the request parameter SIZE_10X10.

New in version 13.07.2020:

1. For Form 103, the calculation of the VAT amount has been changed.

New in version 17.08.2020:

1. Delivery of international shipments of all types is suspended to Yemen due to hostilities.
2. An example of calculating a large shipment (parcel) with a length of more than 71 cm and a description of the parameter in calculationDescription. priceOversize rate has been added to Section 4.

New in version dated 31.08.2020:

1. Section 9 added requests for receiving shipment labels with the PARCEL type – a separate shipment and all shipments from the group.
2. The VAT amount field has been removed from Form 103 for international letters and parcels.
3. For the small package and the parcel on the form CN22 (10[10]), the total value of the customs declaration is added.

New in version 22.09.2020:

1. The international field is removed from the shipment.
2. In Section 3, the name (customer name) parameter has been removed from 6 consecutive numbers.
3. In Section 6, the example of creating and calculating the cost of consignment was changed (the deliveryPriceUA field was added - the cost of delivery within the territory of Ukraine). Changed the table in Appendix E.

New in version 09.12.2020:

1. The parcel.width and parcel.height fields must be specified in the request for creating a shipment.
2. The postPay field must be null or ≥ 1 . Splitting of cash on delivery is not allowed for international shipments.

New in version 22.12.2020:

1. Changed tariffs for international shipments, Annex B and E.
2. A description of the isCommercial parameter is added to Section 7.2.

New in version dated 27.01.2021:

1. A new packageType: EMS has been added to the shipment.
2. An example of creating an EMS shipment is added to Section 4.
3. Section 9 is supplemented with requests for supporting documentation for EMS.
4. Annex E gives an example of the CN23 EMS form.

New in version dated 08.02.2021:

1. For EMS shipments max. parcelItems quantity 5.
2. The contentsType field for EMS shipments (goods or documents) has been added to parcel.
3. SALE_OF_GOODS – sale of goods, cannot be specified for EMS.
4. For EMS shipments, the following weight restrictions have been added (documents – up to 1 kg, goods – up to 30 kg).

New in version dated 17.02.2021:

1. A method for obtaining a specified list of departure fields has been added to Section 4.

New in version dated 26.02.2021:

1. To the description of calculating the cost of cosigning (calculationDescription), the parameter corier delivery is added – the cost of courier delivery.
2. For INTERNATIONAL, INTERNATIONAL_consignment and INTERNATIONAL_EXPORT_PLUS shipments, the shipping type must be W2W or D2W.

New in version dated 05.04.2021:
